PROFILE

A Software Development student with hands-on experience in full-stack development. Skilled in building end-to-end applications and solving complex technical problems with a focus on practical and measurable outcomes

EXPERIENCE

YUMA ENERGY

Software Development Engineer Intern

June 2025 – December 2025

Bengaluru, Karnataka

- Contributed to the company's **internal operations dashboard** by building and shipping multiple scalable features across battery, charging station, and user management domains, improving cross-team operational efficiency by **35%**.
- Developed reusable frontend components using **Vue.js** and **React.js**, improving UI consistency across internal and customer-facing interfaces and reducing average task execution time by **20%**.
- Built and optimized **backend services** using **NestJS**, ensuring secure API communication and achieving faster response times through query optimization and middleware improvements.
- Architected multi-model data handling across services using **MySQL** and **MongoDB**; explored **IoT workflows**, gaining hands-on expertise in real-time energy telemetry and hardware-software integration within a live **EV battery-swapping infrastructure**.

ACADEMIC PROJECTS

Fraud Lens | React, Node.js, Python, FastAPI, MySQL, MongoDB, FAISS.

🐙 [GitHub](#)

- Architected and shipped a **3-tier** research paper integrity platform with independent services, dual databases, automating the end-to-end analysis through **10 AI-powered** features including plagiarism detection, fraud analysis, semantic search, AI-generated summaries, research Q&A and citation graph visualization.
- Engineered a document analysis pipeline that processes each uploaded PDF through **5** AI modules, generating comprehensive integrity reports and enabling **RAG**-based chatbot with semantic retrieval for context-aware responses, significantly reducing manual review effort.

Livi Shield | MongoDB, Express.js, React.js, Node.js, MySQL.

🐙 [GitHub](#)

- Developed a full-stack health insurance platform supporting **13** insurance plans across **5** categories, delivering an end-to-end digital experience for policy purchase, document submission, premium payment and policy issuance.
- Built a workflow-driven underwriting system that orchestrates manages proposal approvals, document review, payment verification and policy lifecycle transitions with notifications, streamlining insurance operations.

SKILLS

Programming Languages: C++, Python, JavaScript

Frameworks: React.js, Vue.js, Node.js, Express.js, NestJS, FastAPI

Databases: MySQL, MongoDB

Tools: Git & GitHub, Jenkins, Postman

Soft Skills: Leadership, Team Collaboration.

ACHIEVEMENTS & CERTIFICATIONS

- Winner - **Code Forge Series** Episode 2 SDC, CIT
- Winner – **Codevortex**, Application Development Hackathon Computing Association of CIT

ROLES

Rotaract Club of Coimbatore Institute of Technology

January 2024 – June 2025

Director Of Club Service

- Spearheaded **20+ events** with **350+ participants**, driving consistent member engagement and delivering high-impact club experiences end-to-end.

EDUCATION

Coimbatore Institute of Technology

Master of Science in Software Systems (Integrated)

October 2022 – Present

Coimbatore, Tamil Nadu

Cgpa: 8.0 (till 8th semester)

Little Flower Convent Matriculation Higher Secondary School

Higher Secondary

June 2020 – May 2022

Tirupur, Tamil Nadu

Percentage: 87.8%
